## Education

B.Com ,Delhi University, 2009

Certification in Web Design  
Advance Premium from  
Admec Institute, 2009

PG Program in Product design  
with Agentic AI and Gen AI  
from Indian Institute of  
technology, Madras, 2026

## Profile

Lead UX Designer & Principal Product Designer with 14+ years of hands-on expertise delivering scalable digital experiences for SaaS, Fintech, Healthcare, and Insurance platforms. Specialist in end-to-end UX—conducting user research, defining IA, building wireframes and high-fidelity prototypes, and shipping production-ready design systems and component libraries. Recognized for driving UX strategy and design decisions at the product and platform level while collaborating closely with Engineering, Product Management, and Data teams. Skilled in data visualization, interaction design, and modern AI-driven workflows including Claude with Figma MCP, Generative AI, and Agentic AI design systems. Consistently delivers enterprise-grade UX solutions that improve usability, reduce friction, and accelerate product adoption.

Experienced in leading end-to-end product design initiatives, including user research, UX strategy, information architecture, wireframing, prototyping, usability testing, and high-fidelity visual design. Strong background in both B2B and B2C ecosystems, delivering intuitive solutions for complex enterprise platforms and large-scale digital products.

Proficient in modern design and collaboration tools such as Figma, Adobe XD, and Miro, along with emerging AI-driven design workflows, including Generative AI, Claude with Figma MCP, and Agentic AI design systems. Skilled in interaction design, data visualization, service design, and design strategy, translating complex business requirements and data insights into seamless user-centric experiences.

Recognized for combining design thinking, strategic problem-solving, and technology innovation to drive UX strategy for complex B2B SaaS platforms, build reusable UI components and scalable design systems

## Profile

, and continuously refine product experiences through user research, analytics, and evolving AI-enabled design practices. Expert in building and scaling high-performing design teams, establishing UX vision, and driving measurable business impact through user-centered design strategy. Proven ability to own end-to-end product design operations—from research and UX strategy through design systems, stakeholder alignment, and go-to-market execution—across complex B2B and B2C ecosystems. Deep expertise in enterprise design systems, data-driven UX, and emerging AI-driven design workflows including Claude with Figma MCP, Generative AI, and Agentic AI pipelines. Recognized for translating business ambiguity into scalable, intuitive digital experiences that accelerate product adoption and drive revenue growth.

## Work Experience

### Senior Lead UX Strategy & Design

Majesco | June 2022 - Present

- Led end-to-end UX strategy and design for complex B2B SaaS platforms, building scalable design systems, reusable UI components, and enterprise-grade workflows
- Defining and maintaining a scalable Design System by creating Style guides, Redlines, Design Frameworks, and reusable UI components to streamline development.
- Leveraging Agentic AI Design and Gen AI to transform complex concepts into intuitive user flows, Mock Ups, and interactive prototypes that enhance user engagement.
- Collaborates with product management and engineering teams through active involvement in blueprinting sessions with the client.

## Skills

Adobe Creative Suite  
Figma, Figma Make, Figma Jam  
UX Pilot, Penpot, Uizard, Maze  
Heatmap, Hotjar, Optimsely  
Synthetic Research  
Qualitative Reserach  
Design Thinking, System Thinking  
Claude with Figma using MCP  
Leadership & Management  
Wireframing & Prototyping  
Behavioral Design Principle  
Prompt Engineering  
Agentic AI Design  
Stitch, Antigravity  
UX Design & UI Deisgn Principle  
AI Design Tools  
Mobile App Design  
Agentic AI Design  
Perplexity, Claude, Storybook  
HTML,CSS,Javascript  
Product Design  
User Interface Design  
User Experience Design  
Design System

## Work Experience Continued

### Senior Lead UX Strategy & Design

Majesco | June 2022 - Present

- Conducting in-depth UX Research and User Research to continuously refine and optimize UI frameworks based on user feedback and AI Design trends .
- Integrate customer insights, research findings, and team-specific journey data at the journey level.
- Serve as a champion and advocate for exceptional user experiences, disseminating best practices in ADA/WCAG accessibility standards compliance, while also demonstrating a keen interest in understanding user needs and behavior

### Senior UX Designer

Saviynt | Nov'2021 to Jun'2022

- Defining and maintaining a scalable Design System by creating Style guides, Redlines, Design Frameworks, and reusable UI components to streamline development.
- Led end-to-end UX strategy and design for complex B2B SaaS platforms, building scalable design systems, reusable UI components, and enterprise-grade workflows
- Played a key role in conceptualizing and producing insightful data visualizations to enhance platform analytics.
- Responsible for improving the user experience and platform design of Saviynt, a web-based SaaS cloud-native Identity Governance and Administration (IGA).
- Create UX workflows, prototypes, wireframes, data visualizations, and manage the evolution of the Saviynt design system
- Champion the implementation of WCAG Accessibility Standards

Information Architecture  
B2B and B2C Platform  
Customer Experience Design  
ADA/WCAG Accessibility Compliant  
Usability, Cursor, Grok  
RAG AI Framework  
Conversational AI  
Nudge Theory & Behavioral Science

## PREVIOUS WORK EXPERIENCE

### Senior UX Designer

Iris Software | Mar'2021 to Nov'2021

- Developed responsive design mockups, web and mobile applications, and dashboards while creating wireframes and prototypes using Axure RP 10 and Figma for Citibank.
- Led end-to-end UX strategy and design for complex B2B SaaS platforms, building scalable design systems, reusable UI components, and enterprise-grade workflows.
- Conducting in-depth UX Research and User Research to continuously refine and optimize UI frameworks based on user feedback and New Design trends.
- Defining and maintaining a scalable Design System by creating Style guides, Redlines, Design Frameworks, and reusable UI components to streamline development.

### UX Design Lead

Travelwings | Aug'2019 to Mar'2021

- Enhanced UX by resolving usability & navigation challenges while effectively communicating design concepts and prototypes to developers.
- Crafted wireframes, user journeys, and mockups tailored for optimal performance across diverse devices and interfaces.
- Led end-to-end UX strategy and design for complex B2B SaaS platforms, building scalable design systems, reusable UI components, and enterprise-grade workflows.
- Collaborates with product management and engineering teams through active involvement in blueprinting sessions with the client.

## Skills

## PREVIOUS WORK EXPERIENCE

### UI UX Design Lead

HCL Technologies | Feb'2019 to Aug'2019

- Conducting in-depth UX Research and User Research to continuously refine and optimize UI frameworks based on user feedback and New Design trends.
- Designed responsive web and mobile apps, creating both low and high-fidelity wireframes, prototypes, and clickable mockups to enhance user experiences across multiple platforms

### UI UX Design Lead

TC Global | Jun'2018 to Dec'2018

- Conducting in-depth UX Research and User Research to continuously refine and optimize UI frameworks based on user feedback
- Created both low and high-fidelity wireframes, prototypes, and interactive mockups, designing responsive web and mobile applications across multiple platforms, including Web, iOS, and Android.
- Collaborating with developers and stakeholders to bridge the gap between design vision .

### Sr. UI Designer

Aon Hewitt | Jul'2016 to Jun'2018

- Created comprehensive mockup designs with interactive workflows for both mobile and web applications.
- Conducting in-depth UX Research and User Research to continuously refine and optimize UI frameworks based on user feedback.
- Collaborating with developers and stakeholders to bridge the gap between design vision and technical implementation.
